FACP-S-H

Fire Alarm Control Panel Screwdriver

OPERATION

The FACP-S-H precision slot screwdriver is designed for fast and efficient terminal connections in most fire alarm control panels. Its extended shaft provides easy access to panel terminals, and the non-slip black oxide head ensures secure contact with terminal screws on each use. The free-spinning cap allows smooth rotation, enabling quick and reliable connectivity.

STANDARD FEATURES

- 3mm fits most terminal screws
- New extended 150mm shaft
- Smooth rotating cap
- Anti-slip black oxide head

RoHS COMPLIANT
